

Foodgrade Range

| <u>APPLICATIONS</u> | <u>PRODUCT</u> |
|---|--|
| Bearings - Rolling Element <i>Regular Load</i> | Shell Cassida Grease RLS Shell Cassida Grease RWS |
| Bearings - Rolling Element <i>Extreme Pressure</i> | Shell Cassida Grease EPS Shell Cassida Grease EPS 1 Shell Cassida Grease EPS 2 |
| Bearings - Rolling Element <i>Heavy Duty</i> | Shell Cassida Grease HDS |
| Bearings - Rolling Element <i>High Temperature</i> | Shell Cassida Grease HTS |
| Bearings - Rolling Element <i>Low Temperature</i> | Shell Cassida Grease LTS |
| Can Seamer Roll Head Bearings <i>(oil lubricated)</i> | Shell Cassida Fluid GLE |
| Can Seamer Roll Head Bearings <i>(grease lubricated)</i> | Shell Cassida Grease EPS Shell Cassida Grease RMS |
| Chains and Conveyors | Shell Cassida Chain Oil 150 Shell Cassida Chain Oil 1000 Shell Cassida Chain HT Shell Cassida Fluid OR 46 |
| Compressors - Rotary Vane & Screw | Shell Cassida Fluid GL |
| Gears - Enclosed <i>Helical - Spur</i> | Shell Cassida Grease EPS |
| Gears - Enclosed <i>Bevel - Worm</i> | Shell Cassida Fluid PL |
| General Purpose Penetrating Lubricant | Shell Cassida Grease HDS |
| Gears - Open | Shell Cassida Fluid HT 32 |
| Heat Transfer | Shell.Cassida Fluid HF |
| Hydraulics <i>Including Air line lubrication</i> | Shell Cassida Silicone Spray |
| Maintenance Spray | Shell Cassida Fluid RF |
| Refrigeration Compressors - Ammonia | Shell Cassida Fluid RC |
| Rotary Cooker | Shell Cassida Grease HDS |
| Rotary Cooker | Shell Cassida Grease HDS |
| Slideways Linkages & Pins | Shell Cassida Fluid VP 100 |
| Vacuum Pumps | Shell Cassida Fluid VP 100 |

Kanady Ltd is a local distributor of oils, lubricants and associated products based in Oxfordshire, supplying a comprehensive range of products to all types of industry.

Engine Oils

Hydraulic Oils

Transmission Fluids

Gear Oils

Metal working Fluids

Greases

Cleaning Agents

Traffic Film Removers

Aerosols

Oil/Grease handling and dispensing equipment.

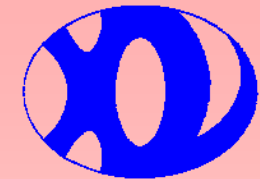

Home Farm Works

Shell Industrial Oils

SLIDEWAY OILS

Tonna Oils Premium performance slideway lubricants specially tailored to table and slideway applications. The new Shell Tonna S has been specifically designed to meet the latest lubrication demands of today's machine tool industry. Approved by most major OEMs.

CUTTING OILS

The new range of Shell cutting fluids has been developed for use with a wide variety of machining applications and materials where the prime requirement is for maximum tool life and optimum work piece surface finish.

All the products in the new range are free from chlorinated hydrocarbons and secondary amines. The range includes:

Macron - Non staining on yellow metals

Metalina - Fully synthetic bio-stable fluids

Adrana - Semi synthetic biostable soluble fluids

Garia - High EP neat oils

Sitala - Conventional biostable soluble fluids

GEAR OILS

Omala premium performance, extreme pressure mineral gear oil that combines high load carrying capacity in steel on steel gear transmissions with good oil life.

Omala RL recommended for use in enclosed moderately loaded industrial gear systems, operating under severe ambient conditions.

Omala HD gear oil with superior performance under extreme pressure.

Vitre premium quality, high viscosity index, mineral lubricating oil for use in all applications where temperatures and loadings are moderate.

Tivela high performance, synthetic industrial gear oils ideally suited for steel-on bronze worm gearbox configurations.

Malleus high performance range of open gear lubricants and thread compounds.

BEARING LUBRICANTS

Morlina range of lubricants for a wide variety of applications. The lower viscosity oils (ISO VG 5 and 10) can be used as advanced spindle oils. The higher viscosity grades are premium quality, heavy duty, bearing and circulating oils

Alvania range of high performance greases, ideal for a variety of industrial applications. Choose the right Alvania grade for your bearings operating condition and temperature and enjoy improved shock protection, longer service life and reduced strain and wear on your machinery.

Stamina range of high-temperature and heavy-duty greases offering long-lasting, stable protection and provides optimal bearing lubrication - even at the highest operating temperatures.

HYDRAULICS

APPLICATIONS

RECOMMENDED PRODUCT

| | |
|---|-----------------------------|
| Extreme temperature ranges | Tellus Oils TX |
| Wide temperature ranges | Tellus Oils T |
| Severe duty applications | Tellus Oils S |
| Medium duty applications in stable temperatures | Tellus Oils |
| Extremely low temperature start ups | Tellus Arctic Oil 32 |
| Significant temperature variation and cleaning properties | Tellus Oil TD 46 |
| Stable temperature and cleaning properties | Tellus Oils DO |

Shell Agricultural Oils

Harvella TX Advanced semi-synthetic oil for most types of diesel and petrol engines as well as tractor transmissions, hydraulics and wet brakes for extending life of mechanical components.

Harvella T High VI multi purpose oil for reliable performance in most lubricant applications in a wide range of modern agricultural machinery.

Harvella S Multi-purpose oil for reliable performance in older agricultural machinery.

Shell Transport Lubricants

Rimula Heavy Duty engine oils for performance and protection even in extreme conditions.

Spirax Gear & axle oils work as hard as the drivetrains they lubricate.

Donax Transmission fluid for automatic buses & trucks. Universal tractor transmissions.

Retinax Automotive greases offering long-life protection for many applications.

AUTOMOTIVE OILS

Helix Ultra Engine oil with maximum engine cleansing for performance motoring. Recommended by Ferrari.

Helix Plus Engine oil with exceptional engine cleansing in all driving conditions.

Helix Super Engine oil with superior engine cleansing for everyday motoring.

Why your car needs the cleansing treatment:-

Over time, oils degrade, and carbon deposits form a sludge that builds up in your engine damaging it and reducing your car's performance.

Shell Helix motor oils contain special cleansing agents that actively lock away this harmful sludge by preventing carbon particles sticking together. This prevents sludge build up and helps to condition your car's engine. So it's not just protected but rejuvenated, revitalised and refreshed. Then it keeps on

reviving and re-freshing, right up to your next oil change. The result is a smoother, cleaner, running engine.
